

amounts of soft money for State parties to spend on TV attack ads.

Let us stand up for clean elections, let us stand up for good political discourse in this country, let us stand up for real campaign finance reform.

STEM CELL RESEARCH

(Mrs. MORELLA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MORELLA. Mr. Speaker, I rise to voice my support for stem cell research under the strict NIH guidelines. I want to thank the Members on both sides of the aisle who have joined with me, both pro choice and pro life, in support of this important research.

This is not a political issue, it is not a partisan issue, it is a medical issue and it is a human issue. It is, for some, a life and death issue. It affects our seniors, women and men; and it affects our children. It goes without saying that the children of this country deserve the best medical research that one can find.

I speak of the children with juvenile diabetes, known as the silent killer. More than 1 million Americans have Type 1, which is the juvenile diabetes, a disease that strikes children suddenly, makes them insulin dependent for life, and carries the constant threat of devastating complications. Someone is diagnosed with Type 1 diabetes every hour. It can and does strike adults as well.

In diabetes research, it is hoped that stem cells can be differentiated into insulin-producing islet cells. In essence, this would be a cure. There are children fighting cancer, and stem cell research offers them hope. Stem cell research will no doubt, in one way or another, touch all Americans. We cannot, we must not shut that door.

Mr. Speaker, I urge President Bush to keep the NIH guidelines in place.

STEM CELL RESEARCH

(Mr. SHIMKUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHIMKUS. Mr. Speaker, many of us just came out of a meeting with the President, and after the meeting he was asked about this issue. He is conflicted. It is a difficult decision on stem cell research. He is not polling. I reject any argument that that has been done, and I am really disappointed in my colleagues for mentioning this. This has long-term implications.

One of my colleagues talked about Galileo and that the planets move and science. Science indicates that individual distinct life begins at conception and a distinct DNA, a distinct life entity is there. That is why to pro-life supporters, this is an abortion debate.

We should use adult stem cell research to cure these diseases. We should protect the most vulnerable. We

should support life from conception to natural death.

FEDERAL FARM POLICY

(Mr. SMITH of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Michigan. Mr. Speaker, today, in a few minutes, we will take up the agricultural bill. In agricultural appropriations we do several things: we have a program in this country with our Federal agricultural policy that guarantees a farmer a minimum price that they can receive from the program commodity crops that they grow.

The problem we are dealing with in an amendment I will offer today says there should be a limitation on how much money goes to any particular producer. The limitation under current law is \$75,000. In the bill that was debated under suspension, unavailable for any amendments 2 weeks ago, we increased that to \$150,000.

I think when we consider that the giant farm operations are taking a lot of that price support money and realistically taking away from the small family farmer, we need to decide what Federal farm policy should be. I would ask my colleagues to consider an amendment of \$75,000 per producer.

We have producers in this country that are now getting \$1.2 million. The average size of farm in this country is 420 acres. We have farms up to 80,000 acres. We should be looking at helping family farmers with Federal farm policy.

THE JOURNAL

The SPEAKER pro tempore (Mr. COOKSEY). Pursuant to clause 8, rule XX, the pending business is the question of the Speaker's approval of the Journal of the last day's proceedings.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HINCHEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 366, nays 42, answered “present” 2, not voting 23, as follows:
